ARMORY AND ATHLETIC PAVILLION.

The State University of Iowa.

—BUREAU OF INFORMATION—

Do you know that investigations recently made by the Union Transcript show that "the University of Iowa has this year a larger percentage of increase in attendance than any other representative university or college in the United States?" How great will be the above might be added the addition that this year's growth at the University is only about the same as the limitation enjoyed during the preceding years.

Does it not occur to you that there must be good and sufficient reasons for this enormous and continual increase in the number of young men and women flocking to the doors of Iowa's State University?

It has been suggested that in the strength of her faculties, the number and convenience of her halls, the resources of her laboratories, the extent of her libraries, the completeness of her museums, and the richness of her general equipment may be found the reason why so many young men and women of and over half of the other states of the Union are selecting this institution for their education.

You are cordially invited to visit the several colleges and schools of the University during your stay in the city that you may to your own judge as to the correctness of the above suggestion.
